Online Safety Evening

2023

The world online....

an increasingly complex and alien environment...

so what can we do to make it safe?

- <https://www.webwise.ie/thefullpicture/#>
- [Children's online behaviour in England and Wales: year ending March 2020](#)
– Data from ONS
- [UK Council for Child Internet Safety](#) – Report commissioned by the Department for Digital, Culture, Media and Sport (DCMS)

The world online....

an increasingly complex and alien environment...

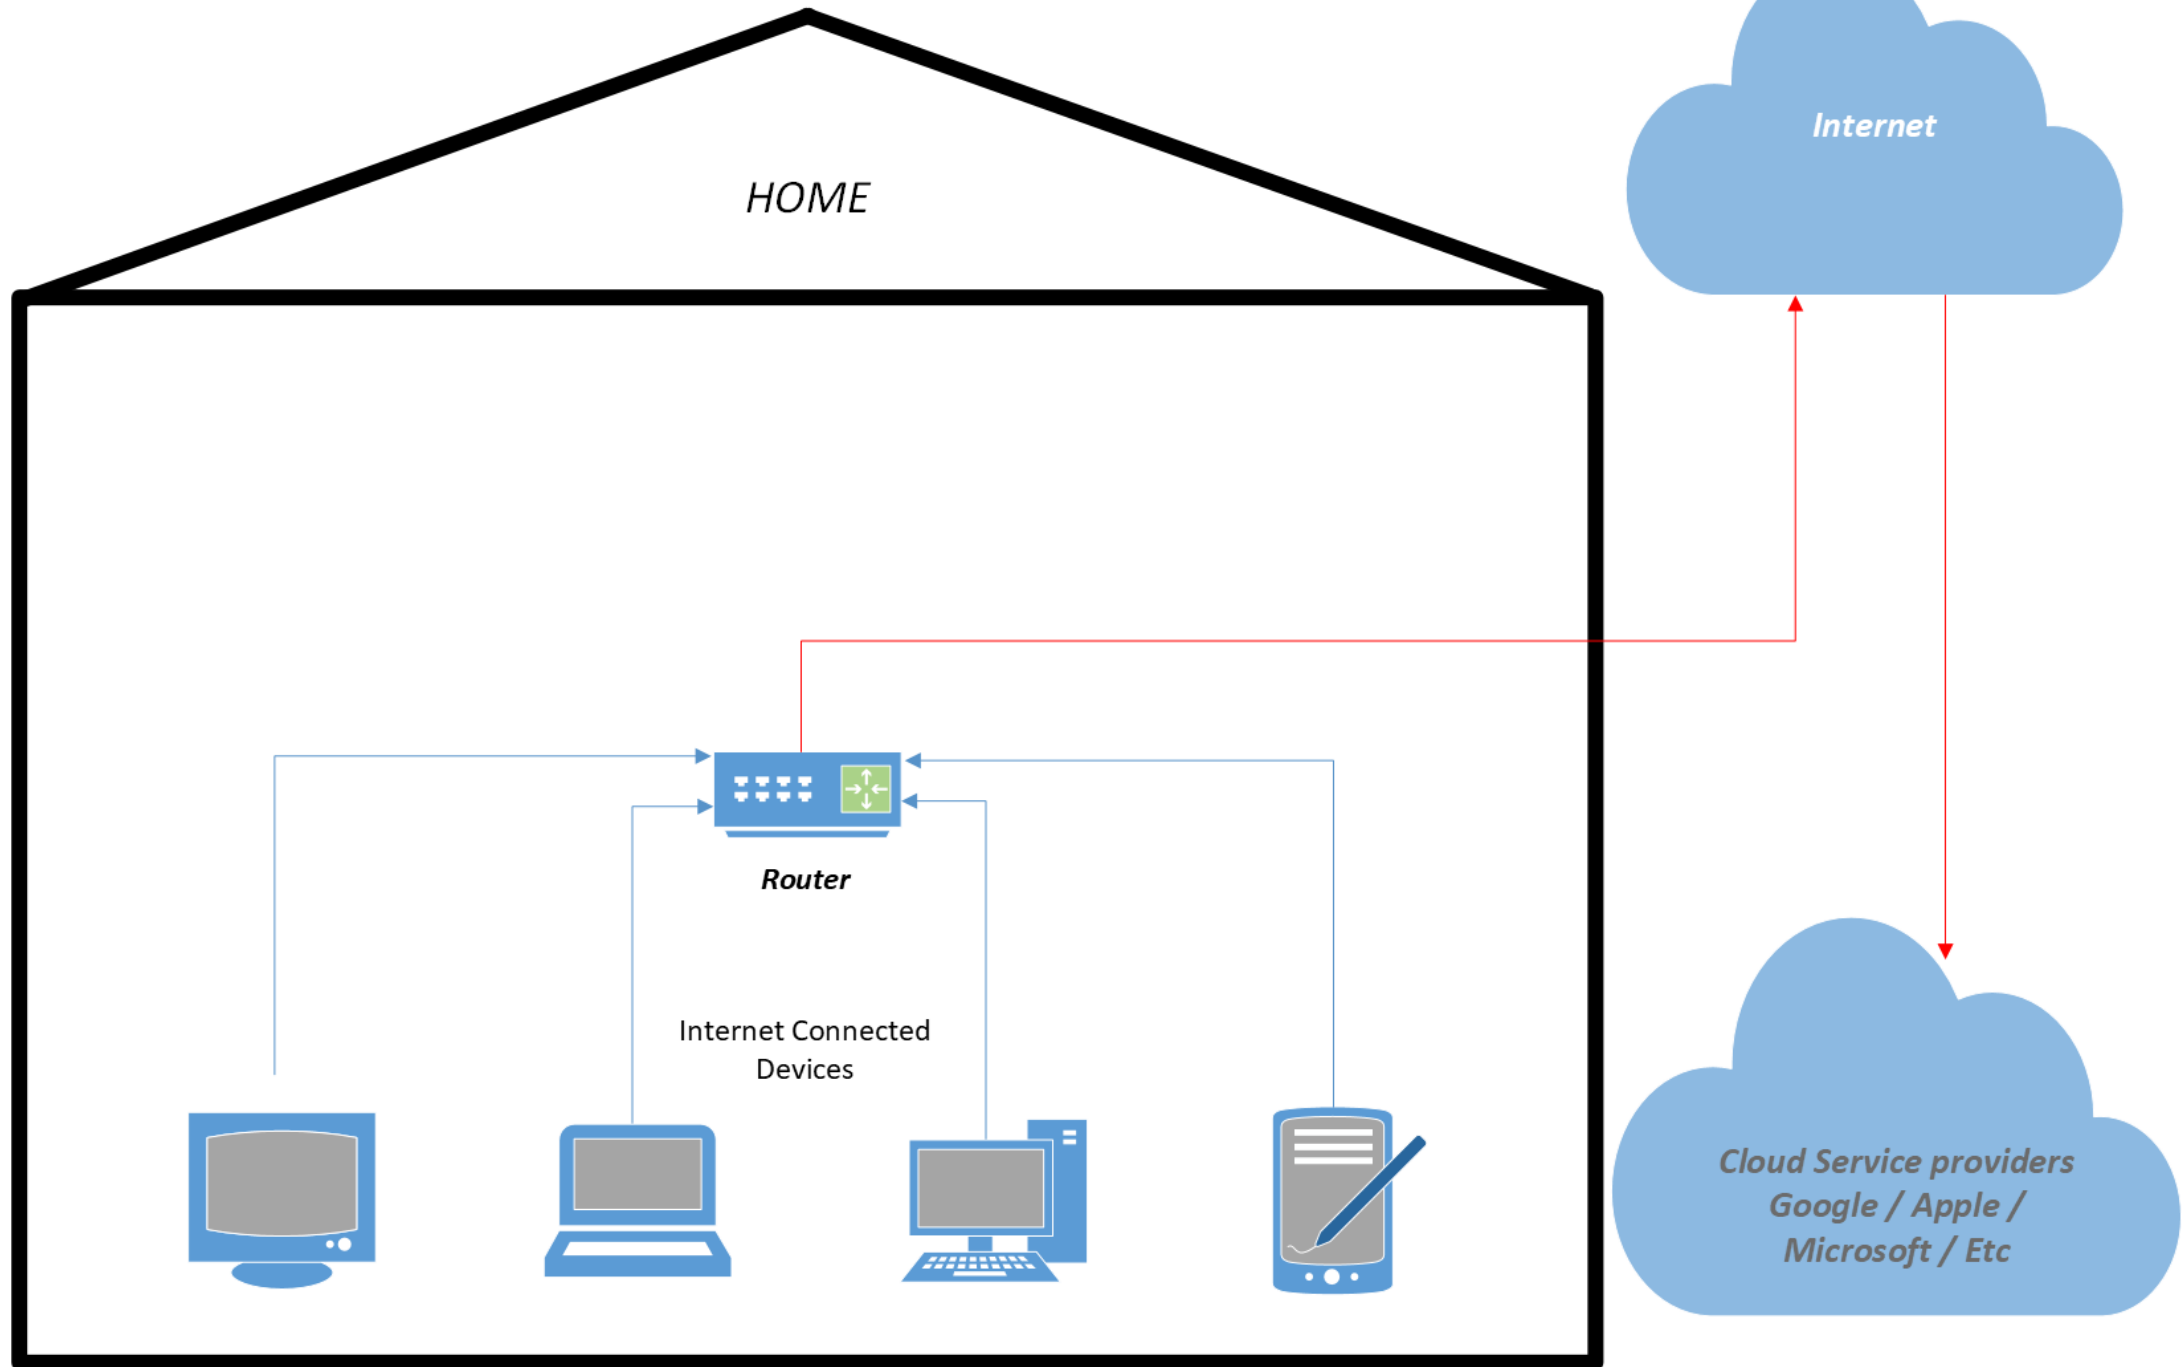

so what can we do to make it safe?

- Two aspects to consider:
 - Technology – software, hardware, settings, permissions
 - People – emotions, choices, support, awareness

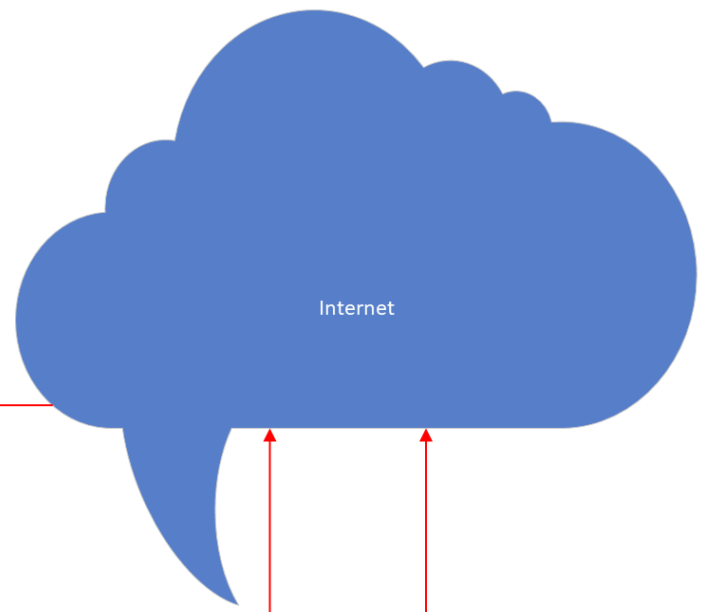

TOOLS

Intro to Device Control

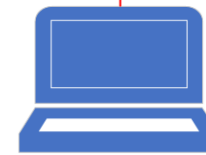

- ISPs (At home and mobile)
- Open DNS (All devices at home)
- Google “Family Link” App (Free, mobile devices)
- IOS (Free, iOS devices)
- Microsoft Family Safety
- “Our Pact” App (Monthly Subscription, all devices)
- Console
- YouTube/Google

Outside the Home

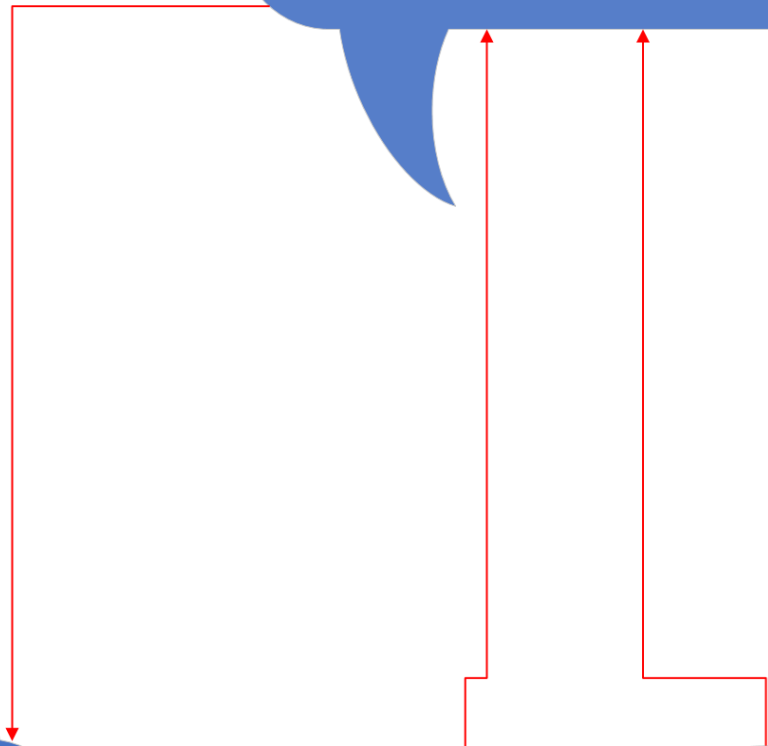

Cloud Providers - Google / Apple / Microsoft / Etc

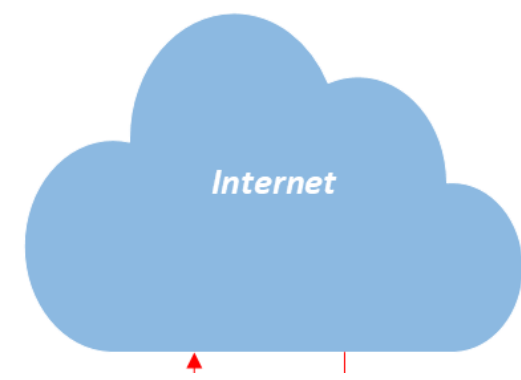

Laptop

Phone

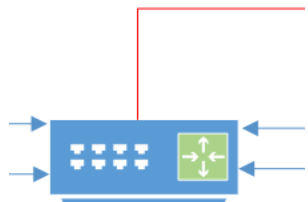

ISP's

- All the big ISP's have internet filtering tools in place.
- You will be able to turn on a general ISP filter which will block most unsuitable traffic.
- No filter is 100%
- There will be a level of customization on what you can block
- There are ways to circumvent the filtering, most common is a VPN.
- A mobile network is classed as an ISP too, and you can turn on the same filtering through them.
- Innocent sites can also sometimes be blocked so be aware of that.

Open DNS

- Network protection

Router

A Brief Guide to OpenDNS

What is OpenDNS?

Open DNS provides Domain Name System resolution services. Their aim is “to make home/small business users internet faster, safer and more reliable”. By using OpenDNS it will give you more peace of mind and give you security over your home network, or on certain devices. It is a part of the company CISCO.

Why users love OpenDNS

Delivers faster, more reliable home internet

Thanks to our global data centers and peering partnerships, we shorten the routes between every network and our data centers—making your internet access even faster.

Helps make the web a safer place

With filtering or pre-configured protection, you can safeguard your family against adult content and more. It's the easiest way to add parental and content filtering controls to every device in your home.

Easy to set up

Get OpenDNS up and running in your home quickly and easy. PhD in Computer Science not required. Thanks to our helpful guides and knowledge base, set up is a breeze.

How much is it?

OpenDNS is free, unless you would like to purchase OpenDNS VIP, which is £14.65 a year.

and Laptops

Smart Devices

Servers

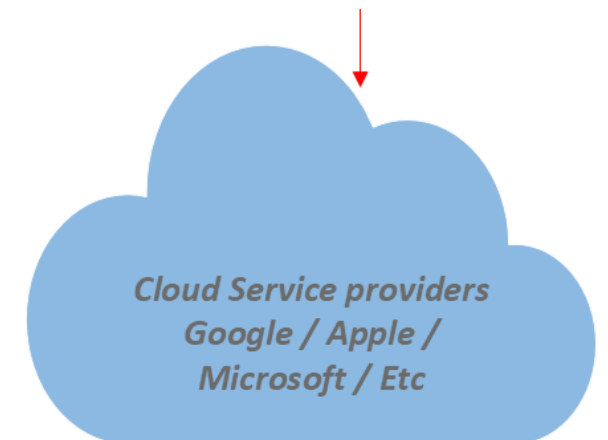

How do I setup OpenDNS?

To setup OpenDNS you can go to their website <https://www.opendns.com/setupguide/#familyshield>

On there they describe how to set it up for the home router, which then means it will control the traffic of every device that connects to it, or just for certain devices (e.g. smartphones, games consoles and/or laptops).

Mobile Device Managers

- Manage the Screen time on your family devices
- Manage how long users can spend on individual apps
- View their location
- Block certain apps, and control which apps can be used/installed.
- Many choices out there
- Some are easier to set up than others
- Some are free, some have a subscription cost.
- No one size fits all solution unfortunately.
- Here are a few...

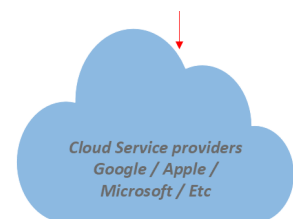

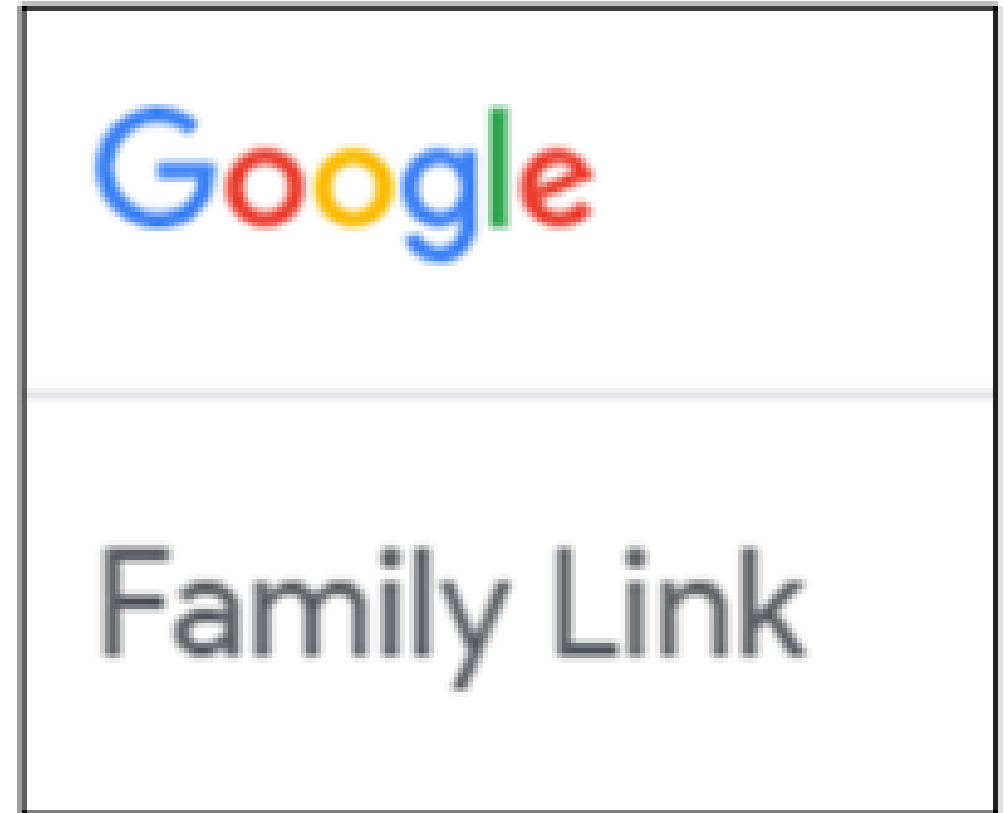

Device Control

- Multiple ways to control devices
- Not every tool may be suitable for your family
- Depends on the devices you use and how you use them

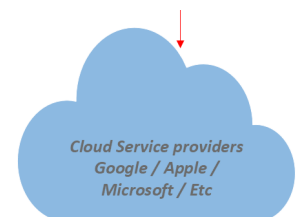

- Best Solution for Android based devices
- Also works with iOS devices but doesn't have the same level of control on iOS
- Uses a Parent App installed on the parents device, and a child app on the childrens device.
- You can remotely control their device from yours.
- Can't block websites completely on the device...
- Uses google's filtering tech to block bad search terms/youtube videos, and mature content on chrome.
- Can monitor location.
- FREE
- <https://youtu.be/465qsv6c3VI>

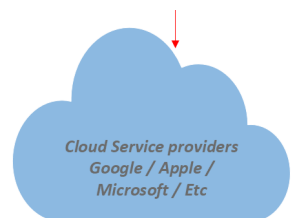

ScreenTime iOS

- Best Solution for Apple Devices
- Only works with Apple(iOS) devices
- Simple setup on the childs device with a passcode, no software setup needed.
- Best for setting limits on usage.
- Can block websites apple deem unsuitable, by age group.
- Can't fully track a childrens location unless they share it with you.
- No monitoring ability.
- FREE
- <https://youtu.be/ZAXcyGw8Q2Y>

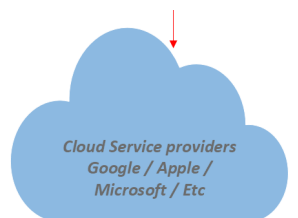

- This will control Windows devices, xbox's, and some limited functionality on android.
- Best option for windows and Android users.
- Will work with Windows 10+, Xbox One or newer.
- Screen time functionality works on Windows, Xbox and Android.
- Track Websites, and block using content filters.
- Control spending on their xbox/microsoft account.
- Uses google's filtering tech to block bad search terms/youtube videos, and mature content on chrome.
- Only filters content on Edge browser.
- Can monitor location, if you have a personal Office 365 subscription
- FREE
- <https://youtu.be/2yhqQQ4ZDMI>

Microsoft Family Safety

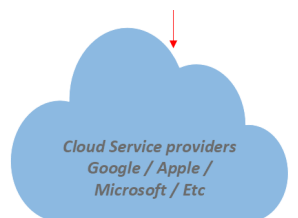

Our Pact

- Best Solution for multi device Households
- Works well with Apple and Android devices
- More involved setup, needing a PC/MAC computer, and USB cables to sync to each device, and will need a number of settings changing on the devices you monitor.
- Extremely comprehensive solution
- Web filtering is limited compared with other solutions.
- Does come with a monthly subscription cost, although Free trial available.
- Would need to be fairly comfortable with tech to install this solution.
- <https://youtu.be/oThFwHBh1yk>

Consoles

- Best Solution for Consoles
- There are multiple consoles out there the common 3 are Xbox, Playstation and Nintendo
- Each devices have their own parent control settings which setup is covered in the video links on this page
- There are no costs for these parental controls they are features with OS of the consoles
- Parent control for PlayStation - <https://www.playstation.com/en-gb/support/account/ps4-parental-controls-and-spending-limits/>
- Parent control for Nintendo - <https://play.nintendo.com/parents/crash-courses/parental-controls/>
- Parent control for Xbox - <https://www.xbox.com/en-GB/apps/family-settings-app>

Disable or enable Restricted mode

Restricted mode is an optional setting that you can use on YouTube to help screen out potentially mature content that you may prefer not to see or don't want others using your device to see.

iPhone & iPad

Turn Restricted Mode on or off

iOS app

1. In the top right, tap your profile picture.
2. Tap **Settings**.
3. Tap **Restricted Mode Filtering**.
4. Turn Restricted Mode on or off:
 - **Don't filter:** Restricted Mode off
 - **Strict:** Restricted Mode on

Turn Restricted Mode on or off

Android app

Turn Restricted Mode on or off

Android app

1. Sign in to your account.
2. On the top right, tap More .
3. Select **Settings** > **General**.
4. Turn Restricted Mode on or off.

Education from
the National
Crime Agency

Welcome to CEOP Education

The National Crime Agency's CEOP Education team aim to help protect children and young people from online child sexual abuse.

We do this through our education programme, providing training, resources and information to professionals working with children, young people and their families.

I am:

A professional working with
children and young people

A parent
or carer

4-7
years old

8-10
years old

11-18
years old

Respecting me, you, us: building healthy relationships and creating positive cultures is a CEOP Education resource for 12-14 year olds developed in association with clinical psychologist, Dr. Elly Hanson.

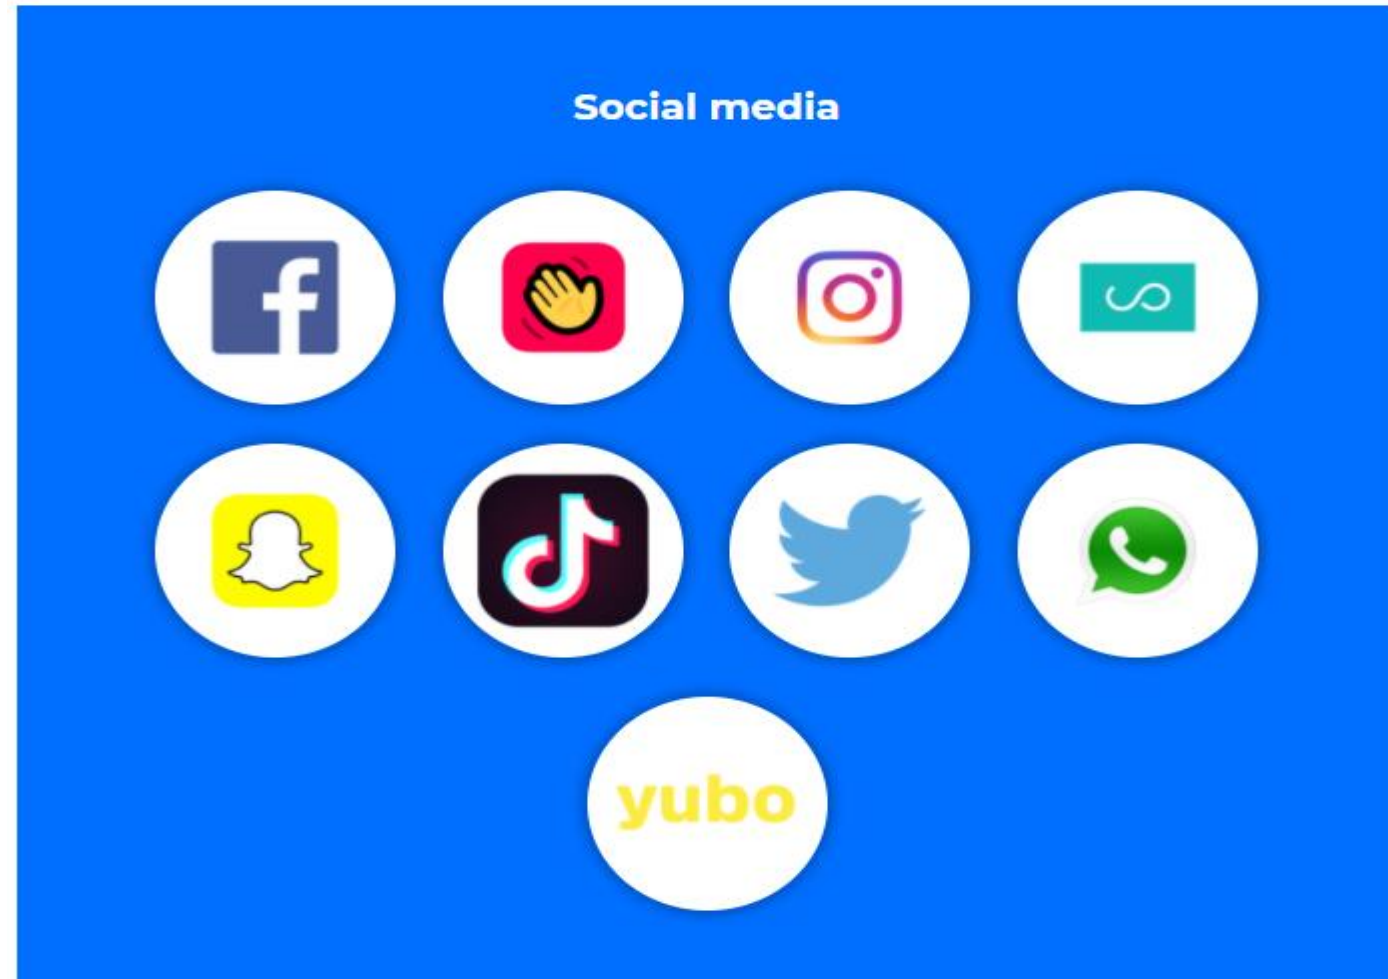

Under 18 and worried about online sexual abuse?

To report, click to visit the CEOP Safety Centre.

Family Agreement

A practical tool to start discussions about how to behave online and set clear expectations for your family.

A3 Family Agreement
PDF Format (297.99kB)

A family agreement is a great way to start a conversation with your whole family about how you all use the internet, and to start discussions together around how to behave in a positive way when online, whether this is at home, at school or at a friend's.

For

[3-7 years](#) [7-11 years](#) [11-14 years](#)
[14-18 years](#)

[Learning activity](#) [Family activity](#)

Online safety agreement

The internet is a very important part of our lives today and setting up an agreement can help ensure that everyone within your organisation/ group are safe when navigating the online world. It gives you the opportunity to discuss together how to behave in a positive way and what to do when things go wrong. Bear in mind it is difficult to have complete control over anyone's internet usage, however an online safety agreement is a great way to set clear expectations for positive and safe internet use.

Please note this agreement is to support your organisation in working to keep young people safe online and should never be used in place of a safeguarding policy or acceptable use policy.

Top tips

- 1 Try to focus on promoting positive behaviour and the choices we can make online which will have a positive impact on others
- 2 Set clear boundaries about what may be unsafe or inappropriate online and include situation promises which may change based on the device, person or app
- 3 Include all members of your organisation or group and make sure everyone is happy with the agreement
- 4 Review your agreement in the future if your group changes or their needs change

Starting questions

Who is this agreement for?

What do we use the internet for?

Why are we creating this online safety agreement?

Examples

Suggested ideas for an agreement in youth groups and clubs

We agree to...

Only to use the clubs iPads during the allocated time

We will help you to find the game/ website/ app you would like to use

Who is responsible for this?

Young people

Group leaders

Suggested ideas for an agreement in residential settings, eg boarding houses

We agree to...

Only use our devices from 5-7pm

Help you set up privacy settings and find report/ block buttons

Who is responsible for this?

Young people

Adults

Suggested ideas for professionals supporting vulnerable young people, eg foster carers

We agree to...

Tell you if someone new contacts us online

Set up parental controls and review them regularly

Who is responsible for this?

Young people

Foster carers

Suggested ideas for other educational settings, eg libraries

We agree to...

Only use computers for research

Set up and review filtering controls

Who is responsible for this?

Young people

Librarian

Online safety in the curriculum

Dedicated focus at the start of each year in Key Stage 3

Topics for each year:

- Year 7 - Social media and respectful behaviour online
- Year 8 – Cyberbullying – how to identify, deal with and prevent it
- Year 9 – Network threats and threat prevention

Focus during the Internet Safety week (2nd week in February)

Focus during PSHE sessions/days throughout the year

Qualification content as part of the GCSE and A Level Computer Science qualifications

Core theme of support and being a good digital citizen throughout all of the topics

Technology, Teaching and Learning

Update for parents –
October '23

Arbor – Is a data management area for staff, students and parents

- For students Arbor allows you to:
 - See your Timetable
 - See your Attendance
 - Manage the recording of your Home Learning

You should log into this now to view your timetable. You should also submit any home learning tasks that have been put on there from the past few weeks.

- A link to Arbor should have appeared on your iPad (if not use the internet and search 'Arbor login')
- Click 'Forgot your password'
- Enter your school email address
- Check the email that is in your school inbox and reset your Password to something you will remember
- Log in to Arbor and view your information

Log in

 Remember me[Forgot your password?](#)

HOME LEARNING – this year the management of HL will be done on Arbor (you will complete the HL somewhere else, eg: in your exercise book, or on OneNote/Showbie/Teams). When you view your area on Arbor it will show you (and parents if they look on their log-in area) what your outstanding HL is, when it is due, which work you have submitted, etc...
