## Angles, Polygons, Pythagoras and Trigonometry

| Objective | Sparx Task |  |
| :--- | :--- | :--- |
| 1.Apply simple angle rules including angles sums in <br> triangles and quadrilaterals | U390 U628 <br> U730 |  |
| 2.Apply parallel line angle rules | U826 |  |
| 3.Classify triangles and quadrilaterals and understand <br> geometric properties | U732 U329 <br> U655 |  |
| 4.Name polygons and solve problems involving <br> interior and exterior angles | U427 |  |
| 5.Understand and apply Pythagoras' theorem in 2D | U385 |  |
| 6.Use Trigonometry to find missing lengths and <br> angles | U283 U545 |  |
| 7.Solve problems including multi-step questions using <br> Pythagoras and Trigonometry |  |  |
| 8.Know exact Trig angles for 0,30,45,60,90 (excluding <br> tan90) and apply to problems | U627 |  |
| 9. Understand proof of angles rules |  |  |
| 10. Use angle properties of shapes to solve problems <br> involving algebra |  |  |
| 11. Find angles of elevation and depression | U967 |  |

## Further Trigonometry \& Trigonometric Graphs

| Objective | Sparx Task |  |
| :--- | :--- | :--- |
| 1.Know and use the sine rule in 2D (including <br> bearings problems) | U952 |  |
| 2.Know and use the cosine rule in 2D (including <br> bearings problems) | U591 |  |
| 3.Apply the sine and cosine rules to 3D problems | U170 |  |
| 4.Know and apply the trig area formula to find areas, <br> sides or angles |  |  |
| 5.Use trigonometry to find lengths and angles <br> between planes within solids. | U460 |  |
| 6.Recognise, sketch and interpret graphs of the three <br> trigonometric functions | U450 |  |
| 7.Know exact values of sin, cos and tan for 0, 30, 45, <br> 60 and 90 degrees ( excluding tan 90 ) | U627 |  |

8.Understand reflections of the graphs of $\sin , \cos$ and tan in the $x$-axis and $y$-axis
9.Understand translations of the graphs of $\sin$ and cos in the $x$-axis and the $y$-axis
