# Online Safety Evening

October 2025

**Thinking point:** What are the concerns we have around our students having access to the internet / web enabled devices?

# The world online....

## an increasingly complex and alien environment...

## so what can we do to make it safe?

- <https://www.webwise.ie/thefullpicture/#>
- [Children's online behaviour in England and Wales: year ending March 2020](#)  
– Data from ONS
- [UK Council for Internet Safety](#) — collaborative forum through which government, the tech community and the third sector work together to ensure the UK is the safest place in the world to be online

# The world online....

an increasingly complex and alien environment...

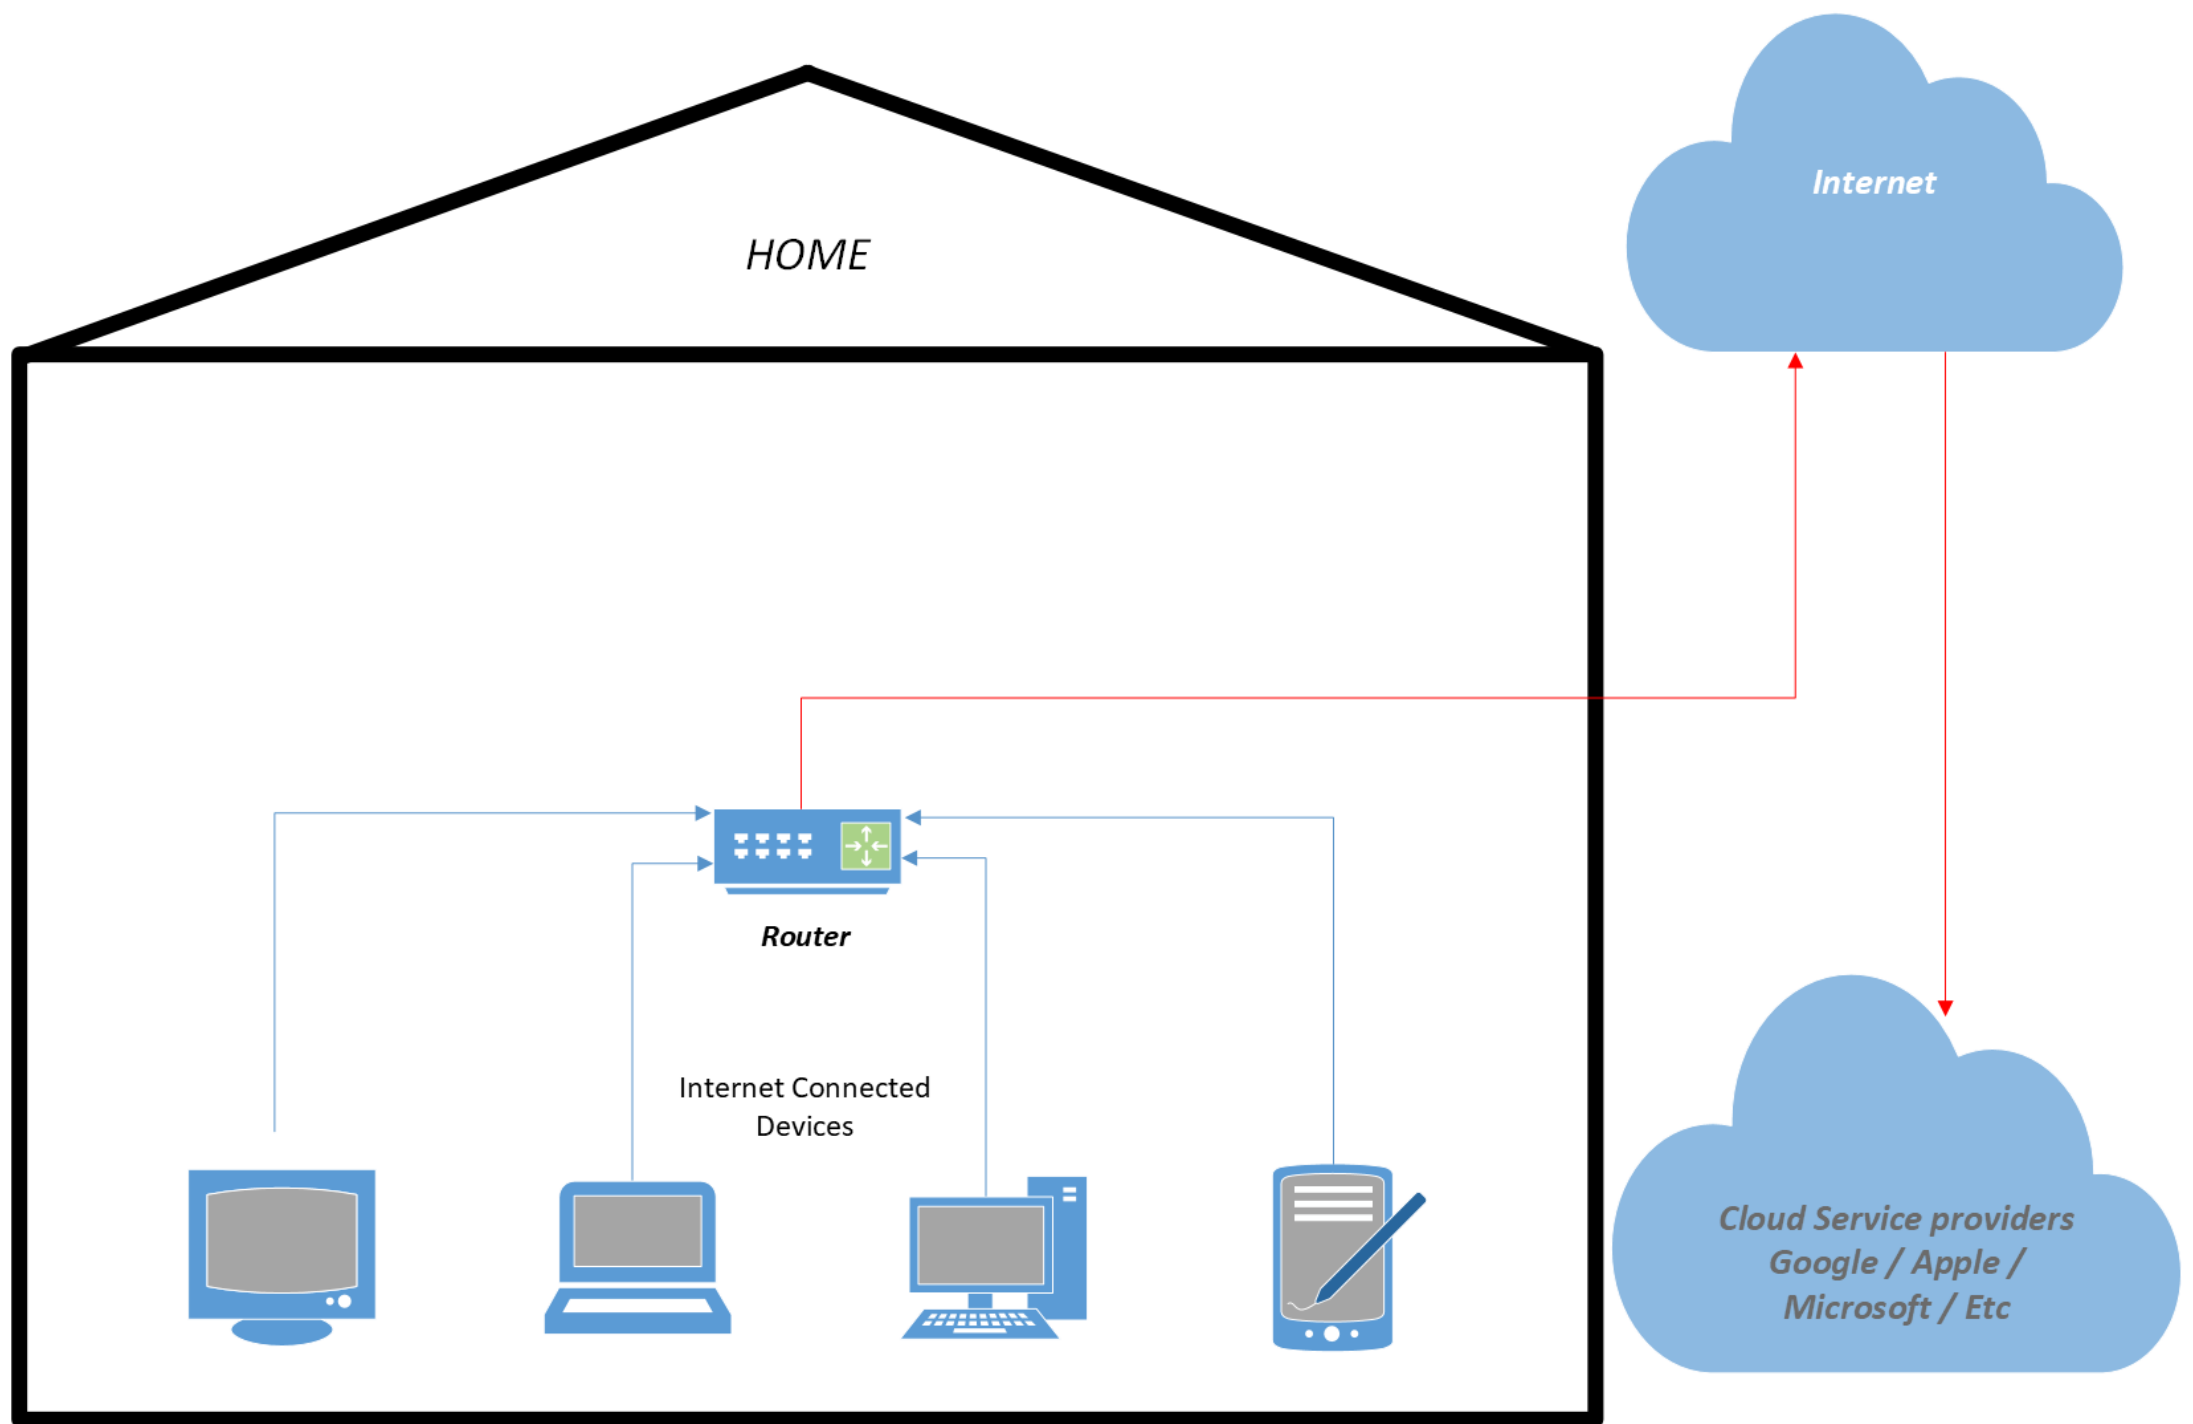

so what can we do to make it safe?

- Two aspects to consider:
  - Technology – software, hardware, settings, permissions
  - People – emotions, choices, support, awareness

# TOOLS

## Intro to Device Control

- ISPs (At home and mobile)
- Mobile Device Managers, i.e apple, google, microsoft etc.
- Console control
- YouTube/Google etc

## *Outside the Home*

# CONTENT KEEPER (School Filtering System for School iPads)

- In School – Filters all devices regardless.
- Out of School – Filters all devices signed into Company Portal (regardless of being in the scheme or not)
- Opt In/Out of advanced filtering – What does it filter?
- Application control – What is filtered?

# ISP's – Internet Service Providers (e.g. BT / Sky / Virgin Media etc...)

- All the big ISP's have internet filtering tools in place.
- You will be able to turn on a general ISP filter which will block most unsuitable traffic.
- No filter is 100%
- There will be a level of customization on what you can block
- There are ways to circumvent the filtering, most common is a VPN.
- A mobile network is classed as an ISP too, and you can turn on the same filtering through them.
- Innocent sites can also sometimes be blocked so be aware of that.

# Mobile Device Managers – Personal Devices

- Manage the Screen time on your family devices
- Manage how long users can spend on individual apps
- View their location
- Block certain apps, and control which apps can be used/installed.
- Many choices out there
- Some are easier to set up than others
- Some are free, some have a subscription cost.
- No one size fits all solution unfortunately.
- Here are a few...

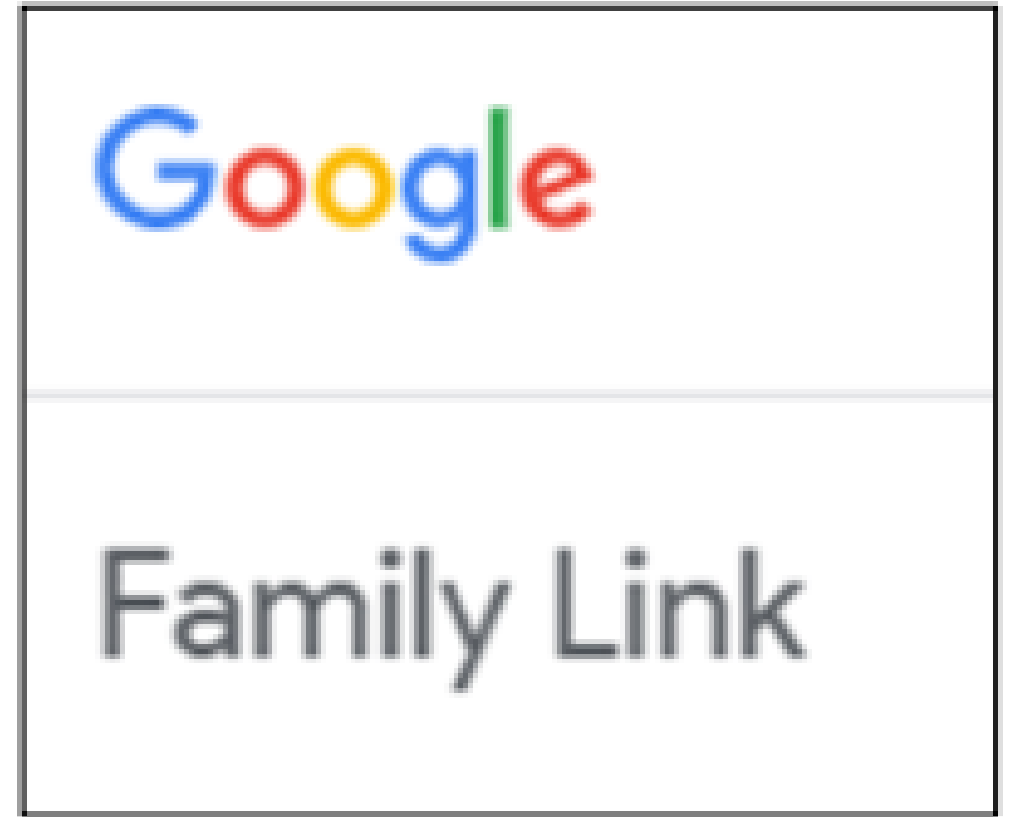

# Device Control – Personal Devices

- Multiple ways to control devices
- Not every tool may be suitable for your family
- Depends on the devices you use and how you use them

- Best Solution for Android based devices
- Also works with iOS devices but doesn't have the same level of control on iOS
- Uses a Parent App installed on the parents device, and a child app on the childrens device.
- You can remotely control their device from yours.
- Can't block websites completely on the device...
- Uses google's filtering tech to block bad search terms/youtube videos, and mature content on chrome.
- Can monitor location.
- FREE
- <https://youtu.be/465qsv6c3VI>

# ScreenTime iOS

- Best Solution for Apple Devices
- Only works with Apple(iOS) devices
- Simple setup on the childs device with a passcode, no software setup needed.
- Best for setting limits on usage.
- Can block websites apple deem unsuitable, by age group.
- Can't fully track a childrens location unless they share it with you.
- No monitoring ability.
- FREE
- <https://youtu.be/JB8SXTC2c5s>

- This will control Windows devices, xbox's, and some limited functionality on android.
- Best option for windows and Android users.
- Will work with Windows 10+, Xbox One or newer.
- Screen time functionality works on Windows, Xbox and Android.
- Track Websites, and block using content filters.
- Control spending on their xbox/microsoft account.
- Uses google's filtering tech to block bad search terms/youtube videos, and mature content on chrome.
- Only filters content on Edge browser.
- Can monitor location, if you have a personal Office 365 subscription
- FREE
- <https://youtu.be/2yhqQQ4ZDMI>

# Microsoft Family Safety

- Best Solution for multi device Households
- Works well with Apple and Android devices
- More involved setup, needing a PC/MAC computer, and USB cables to sync to each device, and will need a number of settings changing on the devices you monitor.
- Extremely comprehensive solution
- Web filtering is limited compared with other solutions.
- Does come with a monthly subscription cost, although Free trial available.
- Would need to be fairly comfortable with tech to install this solution.
- <https://youtu.be/oThFwHBh1yk>

# Our Pact

# Consoles

- Best Solution for Consoles
- There are multiple consoles out there the common 3 are Xbox, Playstation and Nintendo
- Each devices have their own parent control settings which setup is covered in the video links on this page
- There are no costs for these parental controls they are features with OS of the consoles
- Parent control for PlayStation - <https://www.playstation.com/en-gb/parental-controls/>
- Parent control for Nintendo - <https://play.nintendo.com/parents/crash-courses/parental-controls/>
- Parent control for Xbox - <https://www.xbox.com/en-GB/apps/family-settings-app>

# Family Agreement

A practical tool to start discussions about how to behave online and set clear expectations for your family.

### A3 Family Agreement

PDF Format (297.99kB)

A family agreement is a great way to start a conversation with your whole family about how you all use the internet, and to start discussions together around how to behave in a positive way when online, whether this is at home, at school or at a friend's.

### For

3-7 years

7-11 years

# Childnet Family Agreement

A great way to start positive family conversations around online safety, and to agree clear expectations and boundaries.

Start by discussing the questions that are most relevant to your family.

## Getting started

- What do we enjoy doing online?
- What apps, games and websites do we use the most?
- Do we already have any rules about use of tech we want to include in our family agreement?

## Managing time online

- How does it feel when we use tech for too long?
- How do we know when our screen use is interfering with family life?
- What can we do to help avoid overusing tech?

## Sharing

- What should we check before posting images and videos online?
- Do we know how to use privacy settings and what makes a strong password?
- How can we use features like livestreaming and disappearing content safely?

## Online content

- How do we decide which websites, apps, games and devices are okay for us to use?
- What can we do if we see something online which seems unreliable or untrustworthy?
- How can we stop ourselves accidentally spending money in a game or app?

## Communicating online

- Who can we talk, chat or play games with online? Just family? Friends? Anyone?
- How can we keep ourselves safe if we are communicating with people who we only know online?
- How can we look after our friends when we are online?

## If things go wrong

- What can we do if we feel uncomfortable or upset by anything we see or hear online?
- What should we do if someone we only know online asks us for photos, a video call, to meet up or to share personal information?
- Do we know how to find the report and block buttons on the websites, apps and games we use?

## To finish...

- How could parental controls help our family?
- What should happen if one of us breaks the family agreement?
- When should we review our family agreement?

## Want expert advice?

[www.childnet.com/parents-carers-advice](http://www.childnet.com/parents-carers-advice)

Examples for different ages:

Our agreement: (Under 11s)

I will use my tablet for \_\_\_\_ mins a day.

I will make sure the children's favourite games are bookmarked for them to get to easily.

Our agreement: (Pre-teens)

I will tell mum and dad when I see something that worries me.

I will put parental controls in place but review it as the children grow up.

Our agreement: (Teenagers)

I will make sure all my social networking sites are private.

I won't post photos of our children without their permission.

# Online safety in the curriculum

Dedicated focus at the start of each year in Key Stage 3

Topics for each year:

- Year 7 - Social media and respectful behaviour online
- Year 8 – Cyberbullying – how to identify, deal with and prevent it
- Year 9 – Network threats and threat prevention

Focus during the Internet Safety week (2<sup>nd</sup> week in February)

Focus during PSHE sessions/days throughout the year

Qualification content as part of the GCSE and A Level Computer Science qualifications

Core theme of support and being a good digital citizen throughout all of the topics

Students can access support for Cyberbullying and other issues using the 'Speak Up' button on Sharepoint.

# Technology, Teaching and Learning

Update for parents –  
October 2025

# Arbor – Is a data management area for staff, students and parents

- For students Arbor allows you to:
  - See your Timetable
  - See your Attendance
  - Manage the recording of your Home Learning

You should log into this now to view your timetable. You should also submit any home learning tasks that have been put on there from the past few weeks.

- A link to Arbor should have appeared on your iPad (if not use the internet and search 'Arbor login')
- Click 'Forgot your password'
- Enter your school email address
- Check the email that is in your school inbox and reset your Password to something you will remember
- Log in to Arbor and view your information

## Log in

☐ Remember me[Forgot your password?](#)

**HOME LEARNING** – this year the management of HL will be done on Arbor (you will complete the HL somewhere else, eg: in your exercise book, or on OneNote/Showbie/Teams). When you view your area on Arbor it will show you (and parents if they look on their log-in area) what your outstanding HL is, when it is due, which work you have submitted, etc...
