

PRINCE HENRY’S CAREERS ADVICE AND GUIDANCE STRATEGY 2022-2023

PHGS VISION FOR CAREERS

PHGS strives to equip our students with an ambitious and aspirational, knowledge-rich curriculum that empowers young people to have the currency of choice for their futures. Our responsive curriculum will give students the necessary knowledge, skills and habits to become successful learners with balanced lifestyles and become successful adults beyond school, opening the door to university, apprenticeships or employment. Our curriculum acknowledges the importance of building students' cultural capital, building an awareness of the world beyond their frame of reference and deliberately building the necessary vocabulary that enables them to make sense of the world. We want students to comprehend this complex and ever-changing world through appreciating others, understanding what it means to be a good citizen and how to contribute to their communities. We want students to face challenges within school and in their wider life with courage, curiosity, critical thinking and resilience.

THE GATSBY BENCHMARKS

The Gatsby benchmarks set out a framework for schools to deliver good careers guidance to their students. The benchmarks below are fully implemented into our strategy.

1.	A stable careers programme	Every school should have an embedded programme of career education and guidance that is known and understood by students, parents, teachers, governors and employers.
2.	Learning form career and labour market information	Every student, and their parents, should have access to good quality information about future study options and labour market opportunities. They will need the support of an informed adviser to make best use of available information.
3.	Addressing the needs of each student	Students have different career guidance needs at different stages. Opportunities for advice and support need to be tailored to the needs of each students. A school's careers programme should embed equality and diversity considerations throughout.
4.	Linking curriculum learning to careers	All teachers should link curriculum learning with careers. STEM subject teachers should highlight the relevance f STEM subjects for a wide range of future careers paths.
5.	Encounters with employers and employees	Every student should have multiple opportunities to learn from employers about work, employment and the skills that are valued in the workplace. This can be through a range of enrichments activities, including visiting speakers, mentoring and enterprise schemes.
6.	Experiences of workplaces	Every student should have first-hand experiences of the workplace through work visits, work shadowing and/or work experience to help their exploration of career opportunities and to expand their networks.
7.	Encounters with further and higher education	All students should understand the full range of learning opportunities that are available to them. This includes both academic and vocational routes and learning in schools, colleges, universities and in the workplace.
8.	Personal guidance	Every student should have opportunities for guidance interviews with a Careers Adviser, who could be internal (a member of school staff) or external, provided they are trained to an appropriate level. These should be available whenever significant study or career choices are being made.

MEET OUR CAREERS ADVISER

Julie Robinson

I am a level 4 qualified Careers Advisor. I am delighted to be delivering Careers Information, Advice and Guidance at Prince Henry's Grammar School. I have been working at the school for 23 years and during this time I have supported students with their next steps including, A Levels, Further Education, Higher Education, Apprenticeships and T Levels. As part of our careers programme I facilitate events such as the careers fair, enterprise days and pathways days.

LABOUR MARKET INFORMATION

What is LMI?

LMI effectively describes the world of work – ranging from descriptions of different careers, their entry routes, promotional prospects, salaries paid, skills and qualifications needed, etc. Crucially for young people, LMI also covers future demand – what kinds of skills will be needed? Why is LMI Important to Young People? It is vital, in an environment where new industries are emerging and many of the most important jobs of the future don't yet exist, that individuals have access to high-quality labour market information and earnings data to underpin their choices.

ALUMNI

Chloe Tear

Chosen path: Leeds Trinity University – Psychology and Counselling
Current role: I work for Scope as a Disability Ambassador and Disability Vlogger

Tim Frankland

Chosen path: Durham University – Pure Maths
Current role: Working with Microsoft as a Software Engineer
