

You will find here a folder containing 39 pages from the old-syllabus Decision Maths 1 (D1) book, which overlaps a great deal with the current syllabus.

You should work through Chapter 1 (pages 001 to 024 **missing out Binary Search, which is not in our current syllabus**).

You would also benefit from reading through Chapter 2, with its many definitions, and trying to learn some of them.

Answers (pages 177 to 182) are also included.

This will save time and develop skills in preparation for Year 12.

Mr Cooper
